

PARATUS® Change CLASSIC

Pallet changing in less than 30 seconds

With the **PARATUS® Change CLASSIC** changing pallets is faster and easier than ever. You simply put the loaded starting pallet into the heavy-duty, roller-mounted slider, pick up your target pallet with a forklift and use it to push the starting pallet out the back. The integrated spring mechanism ensures that the slider returns to the front with the empty starting pallet, where it then can be removed.

Further details:

- powder coated for a smooth, glossy finish
- standard color: anthracite grey RAL 7016, special colors available
- stainless steel possible (partial or complete)
- premium quality made in Germany
- available sizes: see overleaf

To ensure that the **PARATUS® Change CLASSIC** is a perfect fit for your pallets, following options are available:

- EURO
- GMA
- CUSTOM
- INDUSTRY
- CARGO

You use **pallets in several sizes**? No problem!

This is why we have developed the COMBI and COMBI+ versions. These have widened support surfaces to the right and left of the slider, so that you can transfer pallets of different sizes in the same changer. There are:

- INDUSTRY COMBI
- GMA COMBI+
- GMA COMBI
- CARGO COMBI+
- CARGO COMBI
